

Inflation and My Wallet

Name: Mir Masrur Roll: 2001019 Course: HUM 3211

“Inflation measures how much more expensive a set of goods and services has become over a certain period, usually a year”--- International Monetary Fund

Impact of Inflation on Monthly Food Expenses

This short analysis shows how even small price increases across basic necessities can build up to a significant burden. Due to inflation, I now spend an **extra ₹ 285.5** per month just on essential food items. As a student, this forced me to adjust my spending habits, cut down on non-essentials, and become more conscious of my budget. This exercise helped me realize how inflation directly affects real lives, not just national statistics.
